Portfolio

PROFILE

Full Stack Developer with **5+ years of experience** building high-traffic web and mobile applications for the financial and telecommunications sector in Chile. Specialized in **Angular, React and Ionic** on the frontend, with backend in **Node.js and Python**. I also develop personal projects including **real-time video and audio streaming architectures**, manageable websites, and automated deployment pipelines. Consistent delivery in high-demand Scrum environments. I integrate AI tools into my workflow to shorten development cycles.

EXPERIENCE

Front-End Software Developer

Mar. 2022 – Present · 4+ years

BMSoluciones — Santiago, Chile

Mobile-first app for **Tarjeta Presto LIDER**, a banking product from Banco BCI with a massive active user base.

- Developed and maintained the application in **Ionic / Angular**, covering the full cycle from onboarding to account operations.
- Integrated payment platforms **Khipu** and **Servipag**, and the **Bip!** card top-up flow.
- Implemented push notifications via mobile messaging services for transactional and marketing alerts.
- Implemented **Strapi** as a headless CMS and incorporated new content flows based on business requirements.

Software Development Engineer

Sept. 2020 – Mar. 2022 · 1 year 7 months

Haibu Solutions — Santiago, Chile

Full Stack development for VTR Telecomunicaciones and AFP Habitat.

- Built Full Stack customer service modules (**Ionic / Angular + Node.js**) for **VTR Telecomunicaciones**, a national telecommunications provider.
- Developed web interfaces in **Angular** for **AFP Habitat**, one of the largest pension fund administrators in Chile.
- Delivered an internal cross-platform mobile app with **React Native** for **FrogApp**, a service management, monitoring and control app — from design to production.

Independent Development Projects

Mar. 2019 – Present · 6+ years

Freelance — Santiago, Chile · [View portfolio](#) →

- Built **manageable web apps with Ionic**, architected to work as mobile apps without additional effort, with automated deployment via **GitHub Actions** to a self-managed **VPS**.
- Implemented **real-time video and audio streaming servers**: media server configuration, low latency, and high-concurrency support for listeners and viewers.
- Managed full VPS infrastructure: **Nginx** as reverse proxy, **Docker** for service isolation, and SSL certificates.
- Full cycle on every project: requirements gathering, development, deployment and support.

Developer & Digital Integration Support

Dec. 2017 – Feb. 2019 · 1 year 3 months

Enlace360 — Santiago, Chile

- Maintenance and integration of interactive digital solutions for touch screens and corporate signage using web technologies (HTML, CSS, JavaScript).
- Managed advertising display networks and corporate channels with remote content management.
